

## Khuthaza

Khuthaza, meaning “encourage” in Zulu, was a section 21 non-profit company that supported the development of women in the housing and construction sectors.

Tiber Construction provided Khuthaza with a fully equipped and furnished training centre at their Village Deep Yard facility.

The training centre, sponsored by Tiber Construction, enabled Khuthaza to offer technical training courses as well as management development courses to future entrepreneurs as well as to small business owners. These courses helped to prepare the students for entry into the mainstream construction industry.

"Tiber Construction has made an incredible investment in transformation and capacity building in the industry through sharing their property with Khuthaza! Thank you Tiber!" Elizabeth O’Leary, Executive Director, Khuthaza
