

## The MAD Leadership Foundation

The MAD Leadership Foundation recently announced that it has joined the We Can Change Our World online network, operating in the sustainable social development and transformation space in South Africa.

The network's aim is to facilitate the connection and collaboration between NGO's, Government and Business, and to showcase initiatives, projects and programmes, and share the experiences and insights.

As an NGO and a non-profit organisation, the MAD Leadership Foundation believes its mission to continue providing academically talented scholars with exceptional leadership development opportunities through education, mentorship and other personal development opportunities will be greatly enhanced by this new association.

MAD's tailored Individual Education Program include merit and need-based scholarships for over deserving youngsters, and its Broad-based Educational Programs in the Western Cape, Limpopo and Gauteng directly benefitted thousands of youngsters.

Tiber Construction has supported The MAD Leadership Foundation since 2007, with annual donations to 2011. Since 2012 to date, Tiber Construction has sponsored the MAD Charity Education Programme – Top Achiever Scholar Award. In 2012 we funded a student for the full 5 years at Jeppe High School.

We have also supported MAD in their annual golf days, and successfully bid for various items in their auctions at the golf day.
