

WAVERLEY GIRLS HIGH SCHOOL

Consistent with our belief that the ultimate solution for South Africa's future lies with the provision of education to all our country's children, our initiative for 2011 was the building of 3 new classrooms at Waverley Girls High School. 98% of the girls attending this school come from Alexandra and the school has experienced serious overcrowding over the last few years resulting in very poor teaching conditions.

The building of three new classrooms was overseen by one of our black female foremen. The difference that it has made to the pupils of this school was profound, and the appreciation shown by all the school's pupils made it a very worthwhile and rewarding community project.
